

Growing Up

I should already know.....

- >that all animals have 3 basic needs to survive: **Air, Water and Food** .
- >the names of different animals and the differences between how animals look .
- >that animals eat different things: **Carnivores** eat meat. **Herbivores** eat plants **Omnivores** eat meat and plants.

All living things have 3 basic needs to **survive**: - food, water and air.

All animals, including humans, **reproduce** and have off-spring.

Some animals give birth to **live young**.

Some animals lay eggs which the **young** hatches from.

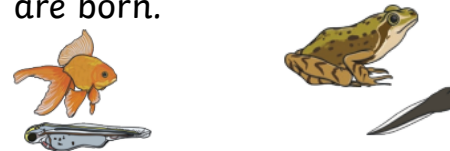

All baby animals (young), **develop** and grow into **adults**.

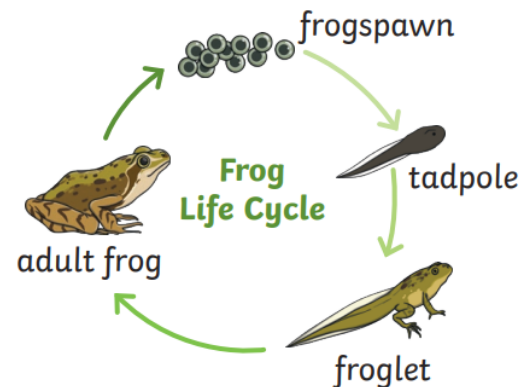

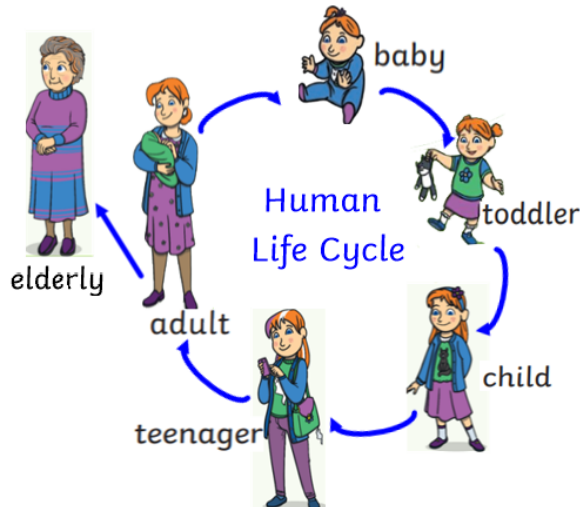

Some **offspring** look like their adult when they are born.

Some **offspring** do not look like their adult when they are born.

All young animals change as they go through the different stages of their **life-cycle** and grow into

Key vocabulary:

adult - a fully grown animal or plant.

develop - to grow bigger and become stronger.

life-cycle - the changes living things go through to become an adult.

offspring - the child of an animal.

young - offspring that has not reached adulthood (babies).

live young - offspring that has not hatched from an egg.

reproduce - to have off-spring.

survive - to stay alive.
