

Weather and Seasons

What do you already know?

I can describe my immediate environment.

I can compare two environments.

By the end of this unit I will be able to:

- Name the twelve months of the year and the four seasons
- Discuss differences between the seasons.
- Discuss types for clothing worn in different weather.
- Discuss how the weather affects different jobs.

Key vocabulary and meanings

- **Rain gauge**—a tool you can use to show how much it has rained
- **Season**—a time of the year with a particular type of weather.
- **Temperature**—how hot or cold it is
- **Weather forecast**—explaining what the weather will be like

The weather starts to get colder in autumn. Leaves change colour and fall off the trees.

Winter is cold, wet and windy. It snows in some areas and gets dark early.

Spring brings warmer weather. Flowers start to grow and baby lambs are born.

In summer, the weather becomes hotter, there is often less rain, but there may be thunderstorms.
